A BRIEF HISTORY OF PUBLIC HEALTH IN NEBRASKA

In honor of the 150th anniversary of Nebraska
Prepared by the Public Health Association of Nebraska

1867 - Nebraska becomes a state.
1868 - The legislature authorizes cities of 3,000 or more to establish local boards of health.
1880 - Walter Reed is assigned to the western frontier at Forts Omaha, Sidney, and Robinson in Nebraska. His daughter, Blossom, is born in Omaha, Nebraska, in 1883. A pathologist and bacteriologist, Reed led the experiments that prove that yellow fever is transmitted by the bite of a mosquito.

1889 - Susan La Flesche Picotte becomes the first Native American doctor (Omaha tribe). She mounts public health campaigns to eliminate communal drinking cups, promote screen doors that keep out disease-ridden flies and warns against the evils of alcohol abuse.
1891 - The State of Nebraska establishes the first statewide Board of Health, headquartered in Lincoln.
1893 - Dr. Oscar Dowling, president of the Louisiana State Board of Health brings his “Health Train” to Lincoln, Nebraska in February to a crowd of more than 6,000 people in frigid weather. The main purpose is to directly influence state legislation to advocate for the establishment of a state-supported bacteriological laboratory.
1913 - Walter Reed
1914 - The first state bacteriological laboratory is formed.
1921 - Division of Child Hygiene is created in the Bureau of Health.
1930 - Public Health Law establishes county health departments.
1935 - Maternal & Child Health Fund and Narcotic Drugs Law and Hypnotic Drugs Law are enacted.
1936 - Division of Sanitation and Division of Venereal Disease are created.
1941 - Division of Public Health Education is established.
1942 - Division of Public Health Nursing is organized.
1942-1945 - Pamphlets are circulated that contain extensive information about diseases that are reportable to the state. They contain specific guidelines about infectious diseases and rules and regulations for quarantining and placarding homes and businesses where disease outbreaks have occurred.
1949 - The Division of Dental Health is established.
1950 - The Nebraska Public Health Association is established (later to be changed to the Public Health Association of Nebraska).
1952 - The Public Health Laboratory in Nebraska is provided supplies necessary for testing specimens, such as culture tubes and media.
1954 - The Division of Communicable Disease is combined with the Division of Venereal Disease.
1959-1961 - The Nebraska Public Health Plan issues a biennial report that provides first-hand documentation of laboratory techniques.
1961 - The Fluoridation Law is enacted.
1964 - The Migrant Health Program is established.
1967 - The Depressant and Stimulant Drugs Control Act and Metabolic screening for newborns are enacted.
1969 - The Rabies Control Act and Inhalants Control Act are established.
1970 - The Nebraska Environmental Health Association (NEHA) is established.
1971 - The Nebraska Department of Environmental Quality is created and the Uniform Controlled Substances Act and Family Planning Program are established.
1973 - Mandatory immunization of school children begins.
1975 - WIC (Women, Infants and Children) nutritional program begins.
1979 - The Nebraska Clean Indoor Air Act is adopted.
1981 - Cancer and Smoking Disease Research Program is created.
1982 - William M. Kizer, Chairman of Central States Indemnity, founds the Wellness Council of the Midlands as a non-profit organization focused on workplace wellness. It is headquartered in Omaha.
1985 - AIDS Program begins.
1987 - William M. Kizer founds the Wellness Council of America. WELCOA is headquartered in Omaha. It helps businesses improve employee health. In addition, the Cancer Control Program is created.
1988 - Core functions of public health are developed: “The Future of Public Health” is released by the Institute of Medicine.
1989 - Susan La Flesche Picotte
1990 - The Nebraska Rural Health Association is formed.
1990 - Nebraska Year 2000 Health Goals and Objectives are developed.
1991 - CityMatCH, founded by PHAN member Dr. Magda Peck, becomes a national membership organization of city and county health departments’ maternal and child health (MCH) programs and leaders representing urban communities in the United States. It is headquartered in Omaha.

1992 - Every Woman Matters Program and Office of Minority Health are established and Public Health Week is initiated in Nebraska.

1993 - Nebraska's first State Public Health Improvement Plan is approved by the Nebraska Community Health Partners Stakeholders Group; Nebraska Health Care Trust Fund is created; Pregnancy Risk Assessment Monitoring System (PRAMS) is implemented; and Hepatitis B vaccine and second MMR are added as school immunization requirements.
